LAND UTILIZATION PROGRAM  
PROJECT LOCATION MAPS

The land utilization project areas located on the maps are those for which full authority of administration and/or custodianship and/or development activities is vested in the Soil Conservation Service, which is currently responsible for the execution of all physical operations of the land utilization program.\*

The location of Project Purchase Areas are presented on three separate map plans; First, on a United States Base; Second, on the Soil Conservation Regional Base, and Third, on individual states, arranged alphabetically.

The United States Base has projects plotted in relation to state and county boundaries plus a separate listing of all the projects. The regional maps which are approximately two to three times the scale of the United States map are in accordance with the ten region plan effective June 1, 1939. They show the location of project areas in relation to county and state boundaries, a separate listing of projects, and a small United States key map of regions. The individual state maps, on a still larger scale, give a more detailed outline of the project areas and locate them in relation to county boundaries, rivers and main cities.

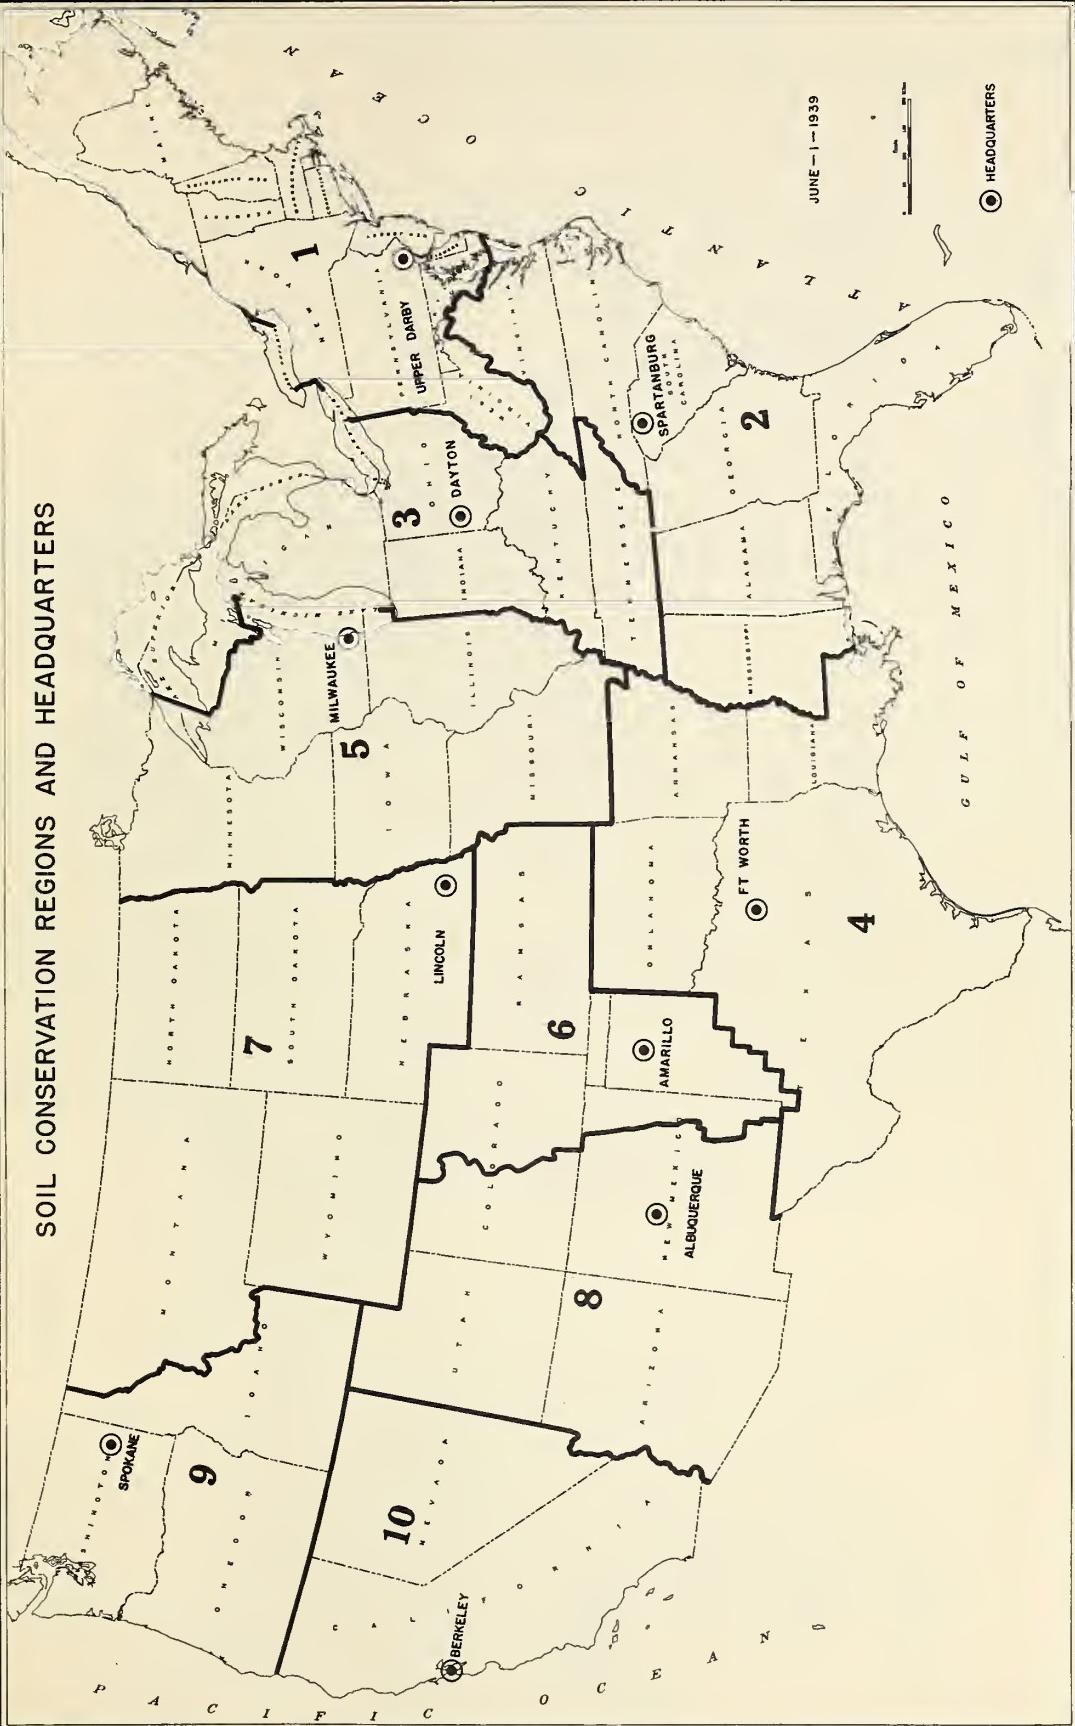

With regard to the project numbering, some of these maps were prepared with each project identified by one of the complete symbols. However, the majority are identified by only the project index number. For example, the various activities of some projects are referred to by several symbols such as LA-SC-5, LD-SC-5 and LU-SC-38-5, but the project is identified on the map by use of the index number, 5.

There are a few state maps in this set which were printed under the Bureau of Agricultural Economics administration of the land utilization program, that carry the BAE credit line and BAE regional identification. However, as new projects are established and corrections or additions to the present maps are made necessary, the corrected sheets will carry the Soil Conservation Service credit line and regional identification.

\*For a detailed and comprehensive list of all land utilization projects, see the "Register of Land Utilization Projects". Also, for a detailed record and status of transfers, see "Status of Administration of Land Utilization Projects".

## SOIL CONSERVATION REGIONS AND HEADQUARTERS

## LAND UTILIZATION PROJECTS

MAY 1, 1939

PROJECTS SHOWN ARE THOSE UNDER SOIL CONSERVATION SERVICE ADMINISTRATION OR CUSTODIANSHIP  
AND THE PROJECTS WHICH HAVE BEEN TRANSFERRED TO ANOTHER FEDERAL AGENCY FOR ADMINISTRATION OR CUSTODIANSHIP  
BUT UPON WHICH THE SOIL CONSERVATION SERVICE IS CURRENTLY ENGAGED IN DEVELOPMENT\*

See PROJECT LIST for additions since Feb. 1, 1939.  
These are shown by a cross, +.

For a detailed and comprehensive list of all Land Utilization Projects see "Register Of Land Utilization Projects" by the Statistics Unit.

\* For a detailed and comprehensive list of transfers see "Status Of Administration Of Land Utilization Projects" by the Division of Project Organization.

For a detailed record and status of transfers see Status of Transfers
